

Experiment 9

Aim: To Understand Continuous monitoring and Installation and configuration of Nagios Core, Nagios Plugins and NRPE (Nagios Remote Plugin Executor) on Linux Machine.

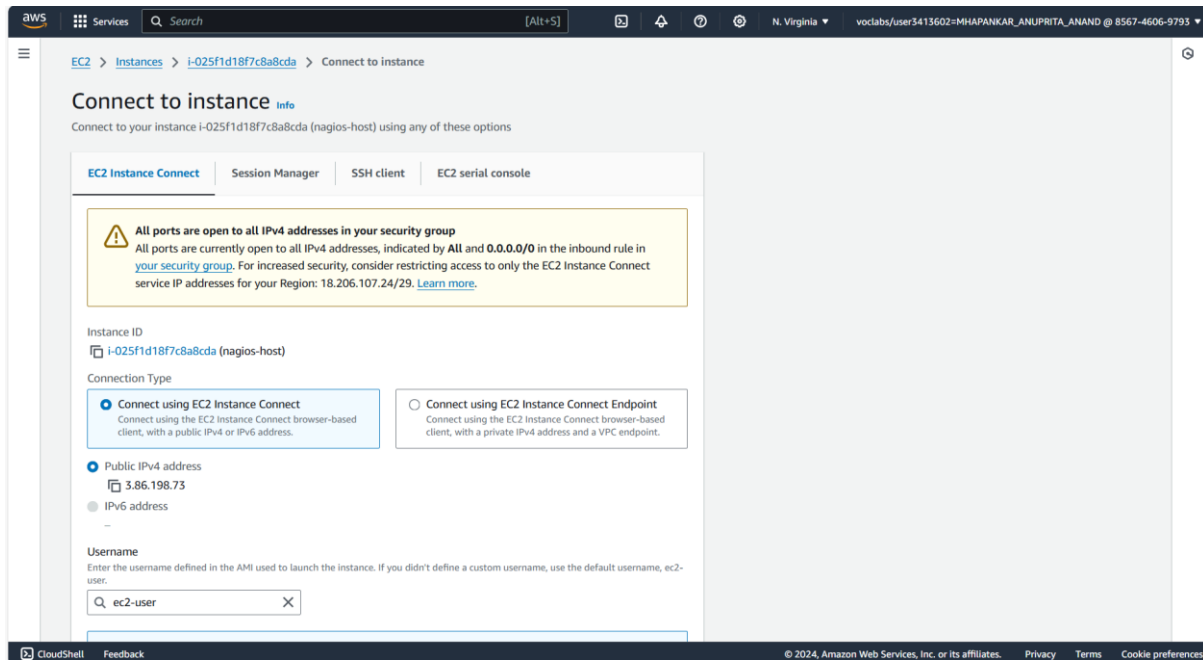

Step 1: Create an EC2 Instance and name it as nagios-host

Step 2: Under the security groups, click on edit inbound rules and set as shown in the figure below

Step 3: Then select the instance nagios-host and then connect the instance.

Step 3: Now, run the following commands -

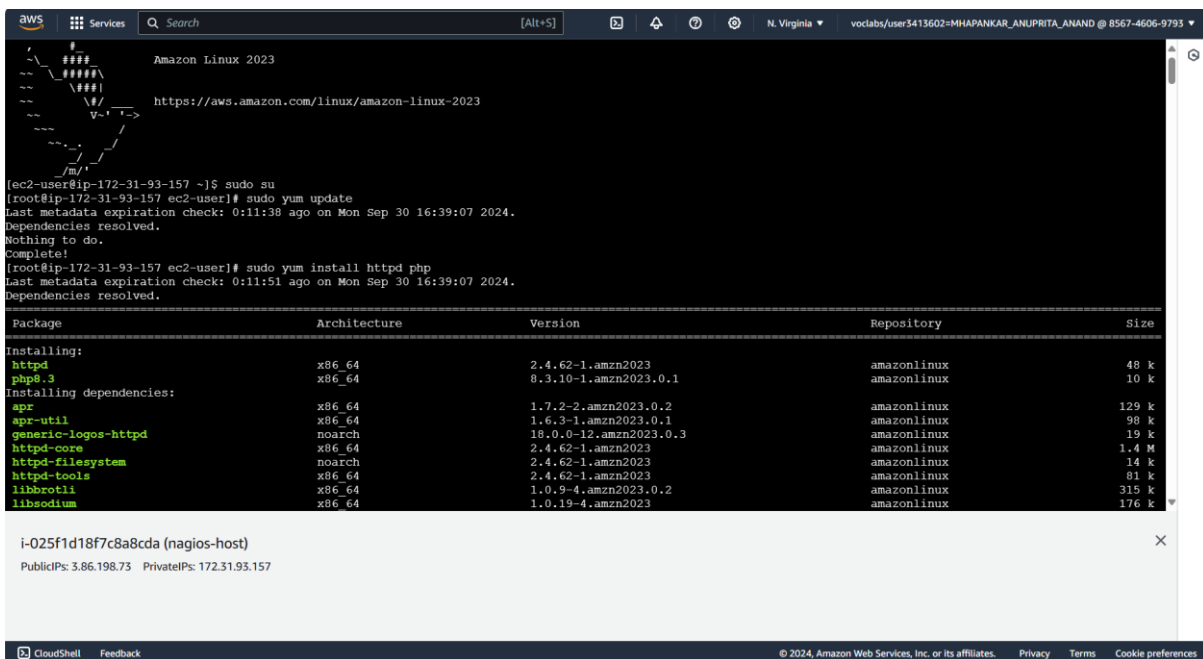

```
sudo su
```

```
sudo yum update
```

```
sudo yum install httpd php
```

```
sudo yum install gcc glibc glibc-common
```

```
sudo yum install gd gd-devel
```

```

*** Support Notes ***
If you have questions about configuring or running Nagios,
please make sure that you:
- Look at the sample config files
- Read the documentation on the Nagios Library at:
  https://library.nagios.com
before you post a question to one of the mailing lists.
Also make sure to include pertinent information that could
help others help you. This might include:
- What version of Nagios you are using
- What version of the plugins you are using
- Relevant snippets from your config files
- Relevant error messages from the Nagios log file
For more information on obtaining support for Nagios, visit:
  https://support.nagios.com
Enjoy.

Step 8: Edit the config file and change the email address.

`sudo nano /usr/local/nagios/etc/objects/contacts.cfg`

```
aws Services Search [Alt+S] N. Virginia voclabs/user3413602=MHAPANKAR_ANUPRITA_ANAND @ 8567-4606-9793

GNU nano 5.8 /usr/local/nagios/etc/objects/contacts.cfg Modified
This contact definition inherits a lot of default values from the 'generic-contact'
template which is defined elsewhere.

define contact{
    contact_name      nagiosadmin      ; Short name of user
    use               generic-contact   ; Inherit default values from generic-contact template (defined above)
    alias             Nagios Admin     ; Full name of user
    email             2022.anuprita.mhapankar@ves.ac.in ; <<***** CHANGE THIS TO YOUR EMAIL ADDRESS *****
}

CONTACT GROUPS

We only have one contact in this simple configuration file, so there is
no need to create more than one contact group.

define contactgroup{
    contactgroup_name admins
    alias             Nagios Administrators
    members           nagiosadmin
}
